Cisco® Interconnecting Cisco® Networking Devices Accelerated (CCNAX)				Cisco® Interconnecting Cisco® Networking Devices Part 2 (ICND2)				CTX-1259CI Citrix XenApp 5 for Windows Server 2003: Administration			
This extended-hours course retains all of the content of ICND1 and ICND2, but merges the content into a single course.				This course focuses on skills and knowledge necessary to install, operate, and troubleshoot a small to medium -size branch office Enterprise network, including configuring several switches and routers, connecting to a WAN and implementing network security.				Students will install and use the various administrative consoles to configure published resources, policies, individual server and server farm settings, load evaluators, isolation environments, printers, streaming applications and more.

SQL Querying - Level 2 Advanced Querying				Hardware				Information Security			
<p>In this course, students will work with advanced queries to manipulate and index tables. Students will also create transactions so that you can choose to save or cancel data entry process.</p>				<p>A+ Certification - Essentials (2009 Objectives)</p> <p>In this course students will acquire the essential skills and information needed to install, upgrade, repair, configure, troubleshoot, optimize, and perform preventative maintenance of basic personal computer hardware and operating systems.</p>				<p>Certified Ethical Hacker (CEH)</p> <p>This class will immerse the student into an interactive environment where they will be shown how to scan, test, hack and secure their own systems. Students then learn how intruders escalate privileges and what steps can be taken to secure a system.</p>

Security+ Certification (2008 Objectives)				ITIL v3 Service Capability - Operational Support & Analysis (OSA)				2543 Core Web Application Technologies with Microsoft Visual Studio 2005			
This course focuses on providing the skills and knowledge necessary to prepare students for the CompTIA Security+ Certification Exam. This course provides the broad-based knowledge necessary to prepare for further study in specialized security fields.				The Service Capability series is focused on role based clusters in a modular set, each with a certification. Each cluster contains groupings of processes and roles from within ITIL IT Service Management, intended to offer candidates a balanced knowledge of ITIL practices which have direct interaction and dependencies in their daily use.				This workshop provides students with the knowledge and skills to develop Microsoft ASP.NET 2.0 Web applications using Microsoft Visual Studio 2005. The workshop focuses on user interfaces, Web site structure and functionality, and implementation details.

2956 Foundations of Microsoft® .NET 2.0 Development				4995 Programming with the Microsoft® .NET Framework using Microsoft Visual Studio® 2005				2433 Visual Basic Script and Windows Script Host Essentials			
This course provides students with the enabling knowledge and skills required to create Microsoft .NET Applications with Visual Studio 2005. Students learn how to develop advanced .NET applications.				This course enables developers who are migrating from a different development language, an earlier version of Visual Basic .NET or Visual C#, to gain guidance on programming Microsoft .NET Framework versions 2.0/3.0 with Visual Studio 2005.				This course will teach Microsoft Windows 2000 operating system administrators how to take advantage of Windows Script Host (WSH) by using the Microsoft Visual Basic Scripting Edition (VBScript) language.

6294 Planning and Managing Windows 7 Desktop Deployments and Environments				6416 Updating your Network Infrastructure and Active Directory Technology Skills to Windows Server 2008				6419 Configuring, Managing, and Maintaining Windows Server 2008 Servers [Accelerated Bundle]			
In this course, students will learn how to plan and deploy Windows 7 desktops in large organizations. They will also learn how to design, configure, and manage the Windows 7 client environment.				This course provides students with the knowledge and skills to work with Network Infrastructure and Active Directory technologies in Windows Server 2008.				This course combines five days worth of training content from the Network Infrastructure Technology Specialist, Active Directory Technology Specialist, and IT Professional Server Administrator courses of Windows Server 2008.

6420 Fundamentals of Windows Server 2008 Network and Applications Infrastructure (Beta)				6423 Implementing and Managing Windows Server 2008 Clustering				6425 Configuring Windows Server 2008 Active Directory Domain Services			
This course introduces network infrastructure and application platform concepts and configurations provided by Window Server 2008. Students will be able to acquire a fundamental understanding in order to pursue advanced topics.				(Preliminary Outline) This course introduces Windows Server 2008 clustering and provides students with the knowledge and skills to implement, maintain, and troubleshoot clusters.				In this course, students will learn how to configure Active Directory Domain Services in a distributed environment, implement Group Policies, perform backup and restore, and monitor and troubleshoot Active Directory related issues.
